

MANAS ACHARYA

Java Backend Developer

+91 9584202737 | manasacharya051@gmail.com | linkedin.com/in/acharyamanas | github.com/Manas1906 | manasacharya.in

Bengaluru, Karnataka, India

Summary

Java Backend Developer with hands-on experience building production serverless systems using Java 21, Spring Boot, and Azure Functions. Skilled in REST API design, microservices architecture, JWT authentication, and cloud-native database integration (Cosmos DB, MySQL, PostgreSQL). Delivered measurable performance improvements and resolved critical security vulnerabilities in live production systems.

Technical Skills

- **Languages:** Java 21, SQL, JavaScript
- **Frameworks:** Spring Boot, Spring Security, REST APIs, Microservices, Hibernate/JPA
- **Cloud & Serverless:** Azure Functions, Azure Cosmos DB, Azure Blob Storage, Azure Communication Services, Firebase
- **DevOps & Tools:** Docker, Maven, Git, GitHub Actions (CI/CD), Postman
- **Databases:** MySQL, PostgreSQL, Azure Cosmos DB (NoSQL)
- **Testing:** JUnit 5, Mockito, Unit Testing, API Testing
- **Security:** JWT Authentication (RS256), OAuth/Firebase Auth, Role-Based Access Control

Experience

Backend Developer Intern

Jan 2026 – Present

Hashout Software Technologies

Bengaluru, India

- Architected a production serverless backend for an enterprise client's large-scale public event registration platform using Java 21 and Azure Functions v4, delivering 13+ HTTP-triggered REST API endpoints.
- Designed a multi-container Azure Cosmos DB schema (7 containers) using direct mode connectivity, reducing latency versus default gateway configuration.
- Implemented Firebase Authentication with smart account-linking logic, automatically merging social login accounts with existing email-registered users.
- Built dual-platform digital wallet integration (Google Wallet via signed JWT/RS256, Apple Wallet via PKI signing), enabling native mobile ticket delivery.
- Resolved a critical authentication vulnerability by centralizing JWT signature verification, replacing unverified token decoding across all secured endpoints.

Associate Quality Assurance Engineer

Mar 2025 – Jul 2025

Sune Solutions

Hyderabad, India

- Designed and executed manual test cases for Azure-integrated enterprise modules, identifying critical edge-case defects prior to production release.
- Performed API-level validation on Azure-hosted REST services using Postman, verifying payload integrity and contract compliance across multiple user roles.
- Collaborated with backend developers to reproduce and triage defects in Spring Boot microservices, reducing average bug resolution time.

Software Engineer

Jul 2024 – Nov 2024

AllReach Technologies

India

- Engineered a student management system using Spring Boot and MySQL; optimized N+1 query patterns, reducing average API response time by 20%.
- Implemented JWT-based authentication with role-specific access control across 3 user roles, eliminating unauthorized access pathways.
- Developed a job portal module within an existing campus management system, expanding platform functionality without monolith rearchitecture.
- Built a personal portfolio website using React.js with reusable component architecture and client-side state management.

Technical Trainee

Jun 2023 – Jun 2024

Fujitsu Consulting India

Bengaluru, India

- Completed structured technical training in enterprise Java development, database management, and Agile workflows within a global consulting environment across a 13-month engagement.

Projects

TaskSphere – Real-Time Agile Scrum Board

github.com/Manas1906/tasksphere

- Built a real-time collaborative Scrum board using Java 21, Spring Boot, and STOMP WebSockets with PostgreSQL persistence.
- Containerized the application with Docker and implemented CI/CD using GitHub Actions for automated build and deployment.

FreshLink – Microservice Grocery Supply Chain Platform

- Architecting a microservice-based platform with centralized JWT authentication, role-based security, and MySQL persistence across user, product, order, and delivery services.

Education

Bachelor of Technology – Chemical Engineering

2018 – 2022

Ujjain Engineering College

Ujjain, India

Certifications

- Java Full Stack Developer – JSpiders (2023)
